HY DO some religious people feel that their religious life must be one of giving up all the fun and enjoyment of living – that in order to please God, they must endure a life of morbid gloom?

For that matter why do some Non-religious people feel that to become a Christian would mean a life of living

As a boy I was brought up in a respectable Protestant church of tradispectable Protestant church of tradi-tional Christianity I never did know very much, as a boy, about what the church believed but I did know that it regarded am as violating their many 00N 75: — don't smoke, don't dance, don't play cards, don't go to the theater,

don't drink a drop of wine, don't do this, don't do that!

A world-famous philosopher, additor, and lecturer whom I knew said he had no desire to live a life of Christian re-pression "I desire," he said, "to be radiant, cheerful, friendly to meet people with a smile. He was a highly educated man but he was a biblical illiterate!

Where do people get all these distorted ideas about the religion of Jesus Christ? Certainly NOT out of the Bible.

They know nothing of the Jesus of the ible, who said, "I am come that they might have tire, and that they might have it more abundantly "

Somehow a lot of people have re-ceived a lot of weird and false ideas about Jesus Christ I mean the Jesus of YOUR BIBLE Actually, I think almost NO ONE knows what the Bible says about Him

It seems most people think sin is the thing that a mast for us, but which a stern, wrathful God donies us Some years ago a little book was selling big on Hollywood neffectioned it was titled How to Sin in Hollywood

Why don't people know that God our Creator has never forbidden us a single "DON'T" about a single thing except that which is going to hake us to our own hurt. What God does command us not to do are the very things that bring on unhappiness, frustration, pain, suffering,

and a life of morbid gloom
Let's get this matter straight. The REAL Jesus Christ said He came to bring us HAPPINESS and KOY! Jesus said "I am come that they might have life and that they might have it more abundantly!"

And He came that we might enjoy full, ABUNDANT life STRINGLY God Al. Personal from... mighty intended the real Christian life to be HAPPY. Jesus said, "My joy I leave

There is a WAY of life that causes , peace, happiness, and joy. God the great Creator set THAT WAY as an inexorable LAW — an invisible spiritual law — to PRODUCE peace, happiness, joy, abundance! There is a cause for every effect. In this unhappy confused world we have discontentment, unhappiness, wretchedness, suffering. The world is full of that, it should be full of peace, happiness, and joy. There's a CAUSE, People don't like God's law. That law is the peace and everything desirable and good. People want everything that is good and desirable. They just don't want to only that which would cause it! They want to se right, but they don't want to no right.

Christ came to call people to REPENT.

Repent of what? Repent of causing unhappiness, strife, war, and pain — and then to receive the gyr of the holy spirit.

And what kind of results will the spirit.

of God produce in you?

I'll tell you, first, what it won't produce. It won't produce the morbid, unhappy, painful, gloomy life that many think is the Christian life. Let the Bible tell you what "fruit" it will produce in you, "But the fruit of the Spirit is love, joy, peace, longsuffering, gentleness, goodness, faith, meekness, temperance, against such there is no law" (Galatians 5:22-23)

Look at that more closely "the fruit this is the spirit of God-This is the holy spirit that God imparts only to those who have repented—that is, turned raom that which has caused unhappiness, morbid gloom, disc agement, frustration, emptiness. On the all love And the second fruit is joy! Joy is happiness brimful and running over That doesn't sound like an unhappy: empty, gloomy life, does it? And God's spirit is not static it flows, spontaneously from God into and through you and out from you making still OTHERS happy and joyful

The very first result produced in your life by God's spirit is love Love is a righteous love of and for others. It will mean your face is beaming it's an out going concern for the good and welfare

ABUNDANT LIVING

of OTHERS. It will mean that you are really GIVING OUT - that you are radiant and HAPPY. And love results in joy that's the second of these fruits. The third is peace. Instead of an attitude of hostility, instead of going around quar-reling, being resentful and bitter, angry, and arguing, you'll be in an attitude of reling, being resentful and Ditter, angley, and arguing, you'll be in an attitude of reacts — peace in your mind and with your neighbor and with you'l Goo.

Next comes "longsuffering." That

Next comes "longsuffering." That means patience How much has impatience made you unhappy? Probably impatience makes more people unhappy than almost anything cise! If you can really come to have patience, you'll be acquiring one of the things that will allow you to be happy and make life

worth living
Then next is gentleness That makes others happy and automatically adds to your happiness. And then goodness and faith! Faith is confidence — not SELF-confidence, but RELIANCE on the SU-PREME POWER It means that the SU-PREME power of God is working for YOU. s reassurance It mes HOPE instead of doubt, fear, discouragement

If you could evaluate in dollars what all these tremendous benefits mean in your life you'd have to put on them a value of millions and millions of dollars But these are benefits you can't BUY. God simply wants to crive them to you What they cost you is nepenting of that which has been producing unhappiness/pain and suffering, discouragement and frustration it's a tremendous BAR GAIN! That is the fruit of God's spirit that will apontaneously spring forth from you, RADIATE from you and cause you to be a JOY to others, as well as to

yourself.

Now this is not to say that there are never troubles in the Christian life. Far from it. There will be PERSECUTIONS. Jesus Christ was persecuted: He said, "If they have persecuted me, they will persecute you." That comes from without. secute you. I hat comes from without.
But UNHAPPINESS is something that
springs from within Happiness is a STATE OF MIND; happiness is WITHIN. And the person who does have this inward peace - this joy, this patience and love, and absence of resentment and bitterness - isn't going to be anywhere near as disturbed and unhappy as when he didn't have them. You'll always face problems -- but you'll have FAITH and God's help in solving them. But prob-lems and tests of faith are good for us the very building blocks of perfect spiritual character.

I know that the Bible says: "Many are the affictions of the righteous," but the same scripture adds, "but the Eter-nal delivereth him out of them all" (Pzalm 34:19).

It's true Jesus was "a man of sorrows and acquainted with grief" It's true He SUFFERED He knew what suffering is But His suffering and grief was caused by pain others inflicted on Him - not from resentment, or being hirr by but by His love for others. He suffered because they were bringing so much suffering on themselves. But He also was a man of boundless Joy, and He said. "My Joy I leave with you

Yes. He said. "I am come that they might have Life, and that they might have it more ABUNDANTLY" flohn 10:10). `a

Food Facts and Fallacies

What do many Americans consider to

be a "food crisis"?

Is it when thousands starve each day. and billions are activinically mainour-ished? No is it when drought grips the Sahel or floods wipe out crops in Bang-ladesh? Of course not!

tadesh? Of course not!

A genume bona fide food crisis is when supermarket prices in the United States rise forty percent in three years. It's when Americana spend more of their disposable income for food (17.4 percent in 1973) than in any year since 1967. Now that? a real disaster, a terrible "food crisis."

Selecting a Scapegoat

The energy crisis has its scapegoats ? the "coming. Arabs and the "inoney-

grubbing" oil companies with their "ob-scene profits" Likewise, the food crisis must have its villains. There are more must have its villains. There are more scapegods than you can shake your food stamps at. You can even take your pick betyeen farmers, agribusiness, grain companies, commodity speculators, consumer advocates, environmentalists, commonats, the Historiana. tors, consumer advocates, environ-mentalists, communists, the Illianinati, banks, any secretary of agriculture from Henry Wallace or, any President since Herbert Hoover, a whole assortment of "middle men" (truckers, processors and "middle men" (truckers, processors and labor in general), supermarket chains, advertisers, exporters, and, of course, God, who's accused, of botching the

It's time to separate some facts from

Fallacy # 1: Earl Butz Caused It

Fact: The Department of Agriculture has certainly made some mistakes over the years, but Earl Butz's biggest blun-der is simply that he become secretary of agriculture at a time when the forces that affect food prices were changing from a situation of domestic surplus to one of worldwille shortage.

one of worldwille shortage.

Earl Butz understands and articulates the essence of the food crisis often and well Writing in Skepiic, he observed, 'There can be no adequate supplies of food produced in any country that insists on clinging to a so-called cheap food policy it won' work.'

Alas, dear Earl of Ag, yon consumer spends too much on food to buy your argument or eat your words, even though you're right.

Fallacy #2: The Russians Caused It ...

Fact: It is true that the Soviets bought a lot of U.S. grain at low prices in 1972, causing grain prices to skyrocket the following year. However, food prices continued to rise dramatically in 1974 and 1975 when

the Russians were not in the market Clearly other factors were involved. The main problem with Russian wheat pur-chases is that the Soviets have only en-tered the international market Sporadically and unexpectedly. The sporadically and unexpectedly the Russian wheat problem now accuss to be solved with the conclusion of a U.S. Soviet agreement that provides for an-nual Soviet grain purchases

Fallacy #3: The Farmers Are Getting Rich

Fact: True, farmers are generally better off than in most previous years, and if export doors remain open, rural prosperity will probably continue. The sudden swelling of grain prices made 1973 an all-time record year for farm profits, but that's not the whole story.

Farmers suffer from the energy crisis, inflation and high interest rater sweet.

Farmers suffer from the energy crisis, inflation, and high interest rates even more than most other Americans. The price of agricultural machinery has risen 35 percent in the last two years and 70 percent since 1967. The average price of fertilizer and agricultural chemicals is up 125 percent from two years ago.

And one good crop year doth not a rich farmer make! One year giveth, and the 1973 record, farm profits fell by 37 percent in 1974. Many farmers are heavily mortgaged, and a bad crop year of tum-

cent in 1974 Many farmers are heavily mortgaged, and a bad crop year or tumbling prices in a good crop year could trigger massive foreclosures. With the rising cost of feed grains, many cattle ranchers are currently on the financial being the price of the grains.

Fallacy #4: Food Exporters Push

Free Up
Fact: If the US closed its export doors,
prices would temporarily go down, but
in the long run these low prices would
drive farmers out of business, thereby
cutting production and forcing prices

back up

If the government chose to avert fore
closure on the farms, it could suppor closure on the farms, it could support the farmer with massive payments. Con-

The Jolly Grain Giánt-American **Agriculture**

U.S. domination of grain markets is even greater, than Middle-East domina-tion of perfoleum markets. Individual States such as Illinois and lows, produce more of certain crops than any nation on earth. I wo thirds of our amber waves of wheat are sent abroad, while over half of all world grain trade comes from the United States

United States
The grain giant is certainly generous, if not folly in sharing his wealth. Here is a rundown of his three major crops.

(JRN The United States is far and away the world's largest corn producer. This year the United States corn crop will be about 5.7 billion bushela, or 45% of world. production. Of all corn that moves in the international markers. 50. moves in the international markets, 50 percent comes from America

percent comes from America.
Farmers in lowa grow well over a hilton bushels of corn per year, or nearly a tenth of, the entire world crop lowa, alone, in fact, produces more corn than China. the second tanking, atton lowa's production is about equal to that of Brazil and the Soviet Union consisted Those two lugs trained the world's third- and fourth-ranking corn producers.

SOYBEANS. The United States soy

bean crop this year was almost 1.5 bil-lion bushela, or 75 percent of total world production America exports over 40 percent of her soybean crop each year, while 55 percent all world soybean trade emanates from the United States. Illinous slone grows one seventh of the world's soybeans, more than any other nation on earth As with corn, China and Brarit engh scored and third.

and Brazil rank second and third - he

WHEAT The world's largest wheat WHEAT The world's largest wheat producer surprisingly enough, is the Soviet Union, annually growing about 30 percent of the world's wheat The United States ranks second, with just least than half as much as Russia. The wheat of the Soviet Union, however, is mostly consumed domestically, whereas over 65 percent of American wheat is shipped abroad.

America's two leading wheat gooding states, Kanasa and North Oakota, annually produce almost as much as Canada and more than Australia. The third- and fourth ranking wheat producers

EXPORTS Perhaps the best way to measure the greedlural strength c'a

EAPORTS Termap the best way to measure the regrecultural strength of a nation is by its influence in the world marker. About half of all world trade in corn, supbeaus, and wheat comes from America, and the value of that trade has risen dramatisely in record years, reaching \$16 billion in 1974.

ing 316 billion in 1974

America's total food exports rose to
622 billion in 1974 It has been these
tising export earnings train have enabled
the United States to pay the higher
prices now being demanded for vital imports such as oil.

WEEK ENDING DECEMBER 6, 1975

smers would then pay for their food twice, once at the supermarket and once again through higher taxes. In addition to higher food prices, America's large balance of trade carm-

America's large balance of trade carnings from agrendural 8-ports would be lost, making it difficult if not impossible or buy international necessities such as oil. Finally there is the moral and geopolitical implication of seeing the world's wealthiest nation slamming its granaries shut in the faces of the world's less fortunities. nate peoples.

Fallacy #5: Grain Reserves Are the

Fact: Reserves cannot be rebuilt closing the door on exports (with all the attendant problems listed under the category above)

Blessed shall be thy basket and thy store . . . and thou shall lend unto many nations, and thou shall not borrow

- Deul. 28:5, 12

As a nation we may ask if reserves are As a nation we may ask if reserves are needed to protect ourselves against pri-vation due to a bad crop year (the like of which we have not had in recent his-tory), but that's a totally different ques-tion But if you think reserves will keep food prices low forget it. The supply and demand equation must new include the demand of the whole hungry world, not just US. demand. not just U.S. demand.

Fallacy #6: Gover Should End

Fact: Government subsidies to the nonproducing farmer actually ended recently.

The government is now only committed to support commodity "target prices." which costs little Actually two thirds of the Department of Agraculture budget goes to another kind of welfare project — food stamps

Fallacy #17: Higher Grain Prices Cause

Fact: The value of wheat in a loaf of bread has gone up one cent in the last three years, although the loaf of bread has escalated eleven cents in price. The price of the loaf is leavened at every truck stop along the way—commodity brokers, processors, truckers, and retail-

Fallacy #8: The U.S. Can Have Dirt-cheap Food Again

Price Not so Americans must now compete on the world market for the American farmer's food. Two recent dollar deva'uations plus the rising affluence of the rest of the world have combined to make U.S. food seem attractively priced market market.

make U.S. food seem attractively priced-on the world market. The nouveaux riches of the world want to ext more protein, and they are buying it, manly through buying feed grains and soybeans.

The Japanese, for example, have doubled their consumption of red meat since the late 1960s. This trend should continue for decades to come, since the average Japanese still eats less than one fifth as much red meat as does the average.

WEEK ENDING DECEMBER 6, 1975

Fallacy #9: Ar High-priced

Fact: Americans spend less of their posable income (17.4%) on food than any other nation. The British spend 25 percent; the Japanese 27 percent; European nations spend 30 percent more; in Asia and Africa, it's well Blote, it raise alto retree, its man of the U.S. We could try to make it cheaper by closing export doors and isolating our surplus. Or we could recognize that to surplus. Or we could recognize that to-day's food crisis demands international

Fallacy # (9: Ar erica Can (and Should) "Go It Alone"

Fact: American food policy will increasingly become warld food-policy. For the simple reason that the United States has a virtual corner on the market (see box)

a virtual corner on the market (see box).

Supply and demand yet live, and demand for food has never been higher. There is economic demand; for the form of marks, pounds, francs, yet pelvs, and rubles, and there is morph demand in the spector of gaunt, hungry faces.

Whether Supply rises toward world demand is a choice for America. If she chooses to "go it alone," she will mideed be alone. She would be a nation without a friend, a nation without a former, and a nation without a conscience, and a nation without a conscience. cause she would be a nation with facts, a people clinging to fallacies about the "food crisis."

In Brief

A Hollow Victory for Dr. Kissinger

A Hollow Victory for Dr. Kissinger

In January 1973 the Israelt and Egyptian forces signed what was referred to as the 101 Disengagement Pact. The actual signing took place in the Sinai and was executed by the respective field commanders of the opposing forces. Immediately thereafter, to lend a little pomp and circumstance to the military formalities, Henry Kissinger flew to Aswan in upper Egypt to "celebrately the occasion with President Sadat. Mr. Herbert Armstrong and I were affectly in Aswam, having arrived an hour earlier than Dr. Kissinger with mepthers of a Japanese delegation. The following day, a Per conferring with Deputy Prime Minister Dr. Abdel Hatem. we flew to Israel for a meeting with Deputy Prime Minister Dr. Abdel Hatem. we flew to Israel for a meeting with Deputy Prime Minister Dr. Abdel Hatem. we flew to Israel for a meeting with Deputy Prime Minister Dr. Kissinger's surface and the social disengagement pact, and I asked Mr. Allon directly for his assessment. With a very way smile Mr. Allon said that Dr. Kissinger's prime contribution was to gat Arab leaders in Syrta and Egypt to agree on one thing: that there was something undesirable about Israeli arms being within some fifty miles of Damascus and Cairo.

Although I had not been present and cannot vouch for the veracity of the story, I have been told that when Dr. Kissinger first arrived in Peking on the secret mission for President Nixon, his ploy to thaw the very cold relationship (in fact unrelationship) between the United States and the People's Republic of Chinia was to point to a map showing clearly the frontier between China and Russia. upon which map he hastily drew-sorte undstinguishable marks and said. "Gentlemen, those are Soviet mosting the story of the proper story of the story is true, the Chinese also agreed that there was something undestrable about having countless Russian divisions, as well as Soviet missiles and other military hardware, poised on their borders.

If it were true however one can easily see why Dr. Kissinger

Deep Trouble Behind the Facade

by Keith Stump

ising impressively from the banks of New York City's East River, the United Nations' tall, stately Secretariat building and the neighboring General Assembly, Comorence and Ulbrary buildings project an impressive service of the first time into the modern well-till toby of the General Assembly building fail to be impressed by a sense of far-racching importance. Surely behind these walls serious displomats from around the globe are carefully pondering and resolving weighty matters of great international significance — striving in the words of the Un Charter, it, save succeeding generations from the scourge of wer.

But bohind this illusory facade lies the increasingly apparent reality—the United.

increasingly apparent reality - the United, Nations 30 years old last month, is in deep trouble

"Infamous Act" ,

In an action strongly denounced by the United States the U.N. General Assembly in early November voted 72 to 35 with 32 abstentions and 3 narrons absent to de-clare Zunism. The movement to set up a Jowish national homestend in Patiestine - a form of racism and racial discrimina-

Om Larry Options

In the final analysis, the U.S. and other industrialized nations lace three choices

WELK ENDINGGERECEMBER 6 19 5

(1) Get along with less energy and face the consequences, with all its potentially disastrous effects on the economy

tially disastrous effects on the conomy and our standard of living.

(2) Rely more on imports of oil and gas, competing with the rest of the world and placing ourselve-gin a precarous and vulnerable position with respect to future price increases and/or em-bargoes

(3) Develop new alternative energy sources of our own. This option will take time, foresight and dedication, and certainly is not without risks and possible failures (see accompanying articles). Actually all these choices should play a part in America's energy tuture. The

a part in America's energy future. The first option has already been exercised to nest option has areast been exercised to a certain exteat bleetijked power con-sumption is down cars are being engi-neered for being gas mileage, and home insulation increasing. Much more can-be done in terms of conservation and the reduction of waste. But conservation alone is not the answer. We need op-

alone is not the answer. We need op-tions two and three as well. Option two the dependence on for eign oil may be acceptable in the short run if it cushions the transition to op-tions one and three. But if it only delays or precludes the implementation of the other options, the increasing reliance on expensive and uncertain foreign sources energy can only spell economic political and perhaps even military disaster in the future

in the future.

The greatest long term hope must be in option three—the development of alternative energy sources. With a good measure of lock and hard weigh option three may provide the ultimate answer to our energy needs. But time is short Robert C. Seamans. It is the head of PRISA puts it mas was "Twee bettere that happened from wood to coal in the 19th centure, and from wood to coal in the 19th centure, and from wood to coal in the 19th centure.

19th century and from coal to oil and gas in this century. Each time it took about 60 years to reach maximum use. We cannot afford to take another 60 years to accomplish the changouver we

years to accomplish the changeover we need now."

Jong before 1736 Americans had come to consider temiselves a distinct and different people totally free and independent. The irrory now is that we Americans on the even of our bicenerical most context that in energy, the very thing which helped make greatness and affluence possible—we are not independent Instead we must hearken to the voices of non-Americans with oil. whose decisions will drastically affect our ability to produce to move to grow America now finds herself in a posi-

tion where the decisions of others affect her unemployment rate her economic health her standard of living her for eign policies and perhaps even her mili-

ry security. Only a dedicated and united people Only a dedicated and united people with strong and decisive leadership, can hope to overcome what is rapidly be coming the greatest economic social and political crisis this nation may face, in the last quarter of the twentieth centers.

We'd better agree on a course of action now for there will be no time for developing new energy sources when the oil runs out.

WEEK, ENDING DECEMBER 6, 1975

PANAGEAS OR MPE DREAMS?

As supplies of oil and natural gas dwirdde, a number of alternative energy sources are being seriously considered for providing future power.

Coal is a prime candidate for meeting America's future energy needs. Iruly staggering amounts of energy are locked up in North American send deposits. The U.S. has 13 to 2.0 trillion tons of each of which 198 button tens result of which 198 button tens to each of the page 100 button tens to each of the page 1

The U.S. has 1.3 to 2.0 trillion fors of coal, of which 390 billion tons are considered readily recoverable. Af curjent levels of consumption, the U.S. has at 1,600 year supply of coal.

But coal is bulky and expensive to ship. It requires large storage facilities, and much of it is high in sulfur and other impurities. Moreover, despite extensive research, scientists have not vet found a truly reliable way to cleans the feet found a truly reliable way to cleans the stack gases of coal burning electric generators.

Net If the ten bulgings for coal match.

Yet if the technologies for coal gasifi-

Yet if the technologies for coal gashi-cation and liquidaction can be devel-oped on a commercial scale the one-time king of American energy might re-turn to the throne.

Nuclear flaston also holds promise flaston also holds promise 8% of the electrical power in the U.S. One pound of uranium with present technology will supply as much heat as \$0.000 pounds of voal going into a coal-burning plant. Proponents of nuclear power staim told nuclear generated electricity is also less expensive than electricity generated by tosal fuels. Opponents maintain that the dangers from teactor accidents, taglioactive

from reactor accidents radioactive wastes and nuclear terrorism preclude wastes and nuclear terrorism preclude the widespread retiance on nuclear power If the dangers and risks of nuclear

power can be overcome however, it may power can be overcome however, it may provide much needed electrical power in the future. But so far the controversy over the risks of nuclear power has not been resolved.

Solar power is another potential alter-

native energy source. Solar energy is free, it's available in every country, its technology is understood, and it is clean and safe. It has no political overtones,

and safe. It has no political overtiones, and there are no ways to steal it, monopolitic it, or deplete it.

The power of the spin facts are common averaging about one kilowati per square meter of surface. At high moon on a clear day in June, the sunshine falling on New York City is the evaporation of the energy producted by the the power plants in the entire world at the power plants in the entire world at the power prants in the entire worth at 3 500 billion billion BTU's reach the surface of the earth each year while only 1 billion billion BTU's are projected to be needed for world consumption by the year 2000

If only two tenths of one percent of the land in the U.S. were equipped with conversion devices capable of a ten per-

cent conversion efficiency, the total U.S. demand for electricity, could be met. So-lar heating and cooling programs could save the equivalent of 1 million-bbl. of oil daily by 1985. This is because more than 80% of the average homeowner's

than 80% of the average homeowner's energy-bill so for heating, cooling, and hot water. One quarter of the energy consumed in the U.S. goes to this end. The challenge is to come up just cheap and reliable systems. So far, solar energy has had only very limited use. This is partly because we have had abundant, cheap fossil-fuels in the past. Solar energy development is also very.

Solar energy development is also very capital-intensive in four years federal funding for solar-energy, research has gone from less than 1 military tollars to more than 100 million. The Energy Research and Development Administra tion (ERDA) has a fiscal 76 budget of \$144 million for solar research. But even with lavish government support experts caution that it will be many years before this energy source accounts for any appreciable portion of the nation i needs

preciator portion of the nation's needs.

What generated electricity is being reborn in certain areas of th. country
where wind selectives asycage 15, to 20
miles per hour. This generally occurs in
constal regions the circuit Plants and on
the U.S. Canadian shorter. Hill and mountain tops are also likely locations thuge (100 megawall) systems are being planned requiring 30 to 100 windmills per 50 acres of land

The primary difficulty is that wind synthesis the primary difficulty is that wind synthesis the first suitable storage devices for the generated electricity. Whether wind can make a sign nificant contribution to our energy

needs remains to be seen. "Geoglie pro-gress, especially west of rine Rockies at-teady dry steam from the Big Scryster area morth of Not Extraction is gener-ating the equivalent of half the city-erectival power. Their risk, Technology of also being explored in other parts of the continenters. I. S. But rechnical problems, high brines concentrations and a relative proofity of suitable sites may limit geothermal energy it, special localities.

INTERVIEW WITH FRANK X. MURRA ËRAY ERGY EXPERT

What power sources can we count on in the future? Will conservation play an important part in tomorrow's energy picture? To find out. Plain Truth interviewed a representative from the Center for Strategic and International Stud-les, Georgetown University, Washington, D.C.

Plata Truth Mr Murray are we facing Printed From Mr. Murray and we facing a long term energy strain or is the variety rent problem merely a temporary mon-senions to the Sources group people?

Misersay I think the general public has simply not grasped the seniousness of the energy vision. We have experienced a foundation of the energy vision.

the energy cross. We have experienced a fundamental change in our basic energy requireshests. And the public has not really recognized the fundamental nature of this change and become willing to accept the increases, hanges in their field with the increasement of his possibility over wine degree of hardship it think people have tended to with the problem was and have been unwilling to squares have the face.

problembana and have been unwilling to uparely har do have dependent saying about the hard and propte are saying about the Loudel States alocant have a someonal energy point, bothin true?

Marring to a report that wontext 1 think what, we try doing how or struggling to folim a manufacturing point; prof. There is a both the saying the folim a manufacturing point.

but of conflict and disagreement book on go about obtaining them I think it is going so take in some time before we truly acress at what we call a matiminal

Hully accord at what we call a maximal energy polity.

Plan Trash, What percentage of our energy requirements is supplied by the satious facilities we are unresulty using?

Mairing, Bassalty there are three main fuels. About 4V6 of our current energy needs comes from perceptions another MR comes from paratical gas. Those two make un about 7V8 of our current enmake up about 15% of our current en-ergy consumption. The remainder of our energy worters come from either coal, hydroelectric or nuclear power Plain Truth. Do you expect these per

centages to change radically an the next few years?

centages to change radically an the next few years?
Murray: No, not in the next few years.
The system that we have evolved over the last eighty years is so large, so complex, and so thoroughly, intervoven throughout our economic and social systems that it's very difficult to change it rapidly without tremendous upheaval. That's why imports will uphoubtedly continue for many years.
Plais Trible, flow much of our total energy supply tomported?
Murray: We currently apport somewhere between as and given million hairets of petioleuly every day. Thus about 40% of our perforderm consumption. We also import a significant amount of natural gas life total, we probably import in the maghborhood of about a fifth of our total energy requirements ight now.

abily import in the hyghothodo of about a fifth of our lodg-energy requirements right now. Plain it rother is the United States more dependent upon foreign sources lodgy than say five years ago? Murray In terms jif petroleum /we're, importing almost typic as much as we were in 1970. That's not a very comforting fact and it's unlikely to change in the near future ji fact assuming there is a significant exposition recovery in the next six months jo a year it i probable that those impojas will go up not down. Plain I right. What impact will the Alasan pipeline have on our energy supply. Murray. The pipeline capacity has been tasted at about 1988 million barrels per day. In terms of our surrent production of this would be about a fifth of our dominational is produced petroleum. So it is approached. mestically produced petroleum. So it u significant

significant.
Pinta Limita. Where does nuclear energy

Plain I rush. Whee does nuclear energy are an alternative energy source in comparison, to found type fuels. Memory, hear all you can prove in used for the generation of electrical energy. This in some degree limits its applicability, particularly to the current economic system with its investment in nomic system with its investment in consumer and industrial goods that use fuels pitter than electrical energy. Of course the problems without are gener ally known, as are the problems with lossed fuel. No one has to trade one

thread fuel. No one has to trade one against the other. Plains Fresh, Would it be better to bequesith to our children adequate power will the resonability of caring for adoustive matrix than to leave them delicent on energy?. Marray. This is the crus of the dilemma we face with nuclear power has well as with other forms of energy. How does one engit the prevent benefits from the energy. How does not engit the prevent benefits from the energy when we mould obtain printing the power we get ersuss the future-doing run cost? Personally, or terms of wage displayed it. I feel a futle more optimisals, than I do about much or proposed. than I di altino wine of the other prob-letin with mustear energy. I thinh within 100 or All years we will find a way to effectively utilize these very waste mate-rials which are giving us such a problem. Plain Limits What about coal! Marray. Coal has some problems associ-ated with it too. They involve both the

ared with it loot heey involve both the mining (terp vs. underground) and the air pollution associated with burning the coal cince one gets it out of the ground to the power piant. Neither of these are trivial problems of one friends to an crease the amount of electric power

which is provided by coal They can

which is provided by coal liney can both become very significant. So you're confronted with a dilemma between the environmental problems as-sociated with one fuel versus the envi-ronmental problems associated with another These are the types of things another: I nesse are the types of things that societies have to weigh and evaluate Plain Truth: Is energy from controlled nuclear fusion a likely prospect in the next 25 years?

Murray: Fusion energy is really in its infancy. I think from that one must con-

infancy I think from that one must conclude that fusion power in a commercial sense is many years away. Probably one really ought to think in terms of decades rather than years.

Plaba Truth: Is in true that if we keep increasing our domands as an the past few years that fell need to complete one new power plant every 25 days for the next 20 recars?

Mustrey: That's probably a conservative estimate formpared with some that I've heard. We may wen be faced with that stuation if we continue to increase our energy consumption the way we have in energy consumption the way we have in

heard we may set the faced with that situation if we continue to increase our energy consumption the way we have in the past. Of course the whole point of much of the debate and discussion going on now residues around the ideas of onservation and of changing the energy consumption patterns of the people. Plain Truth. You mentitured conservation If we cuttail or drasfically reduce consumption of energy will this diversely affect the economy? Marray There seems to be a very direct discussion and various measures of economic we find the property of the pr

ren do to conserve energy in a inglui way?
Manyan I think the bissent thi

ingful feet. I think the biggest thing the average critical cauche in to recognition self. In over his support and activities in terms of their general continuation. In other words he should be energy con-

their thermoutate down, and most of them really did.

People were asked to car pool and they did and take the bus and they did but somewhere along the may we four our commitment? It had a for to do with things that look prace should be therefore twolving watergate and majolving the confidence that people had in their government. That was a very inflortingate sequence of events because I think we do that had cape when we had in 1924 for local had redge when we had in 1924 for think we re going to have to learn to make it a meaningful part of our every-make it a meaningful part of our everymake it a meaningful part of our every-

Women's Lib'75: Moderates vs. **Marxists**

by Linda Biosser and Jeff Calkins

Liking a cue from the motion picture, "Alice Doesn't I welfere Anymore," the National Organization of Women (NOW) set aside Wednesday, October 29, as a national women's strike, to be known as "Alice Doesn't," Women were asked to cancel all their normal activities "Shooming surfaces," of the strike of the "Shooming surfaces, and the strike of the "Shooming surfaces," of the strike of "Shooming surfaces," of the "Shooming surfaces, and surf

'shopping, working, and even sex - to demonstrate how much "the system" de-

demonstrate how much "the system" de-pends upon them.

The move resembled the theme of the ansems Greek plan. I constrain, in which the women of Athens true to force their mentolik to stop a war by withholding their conjugal dues But the modern ver-sion wasn't nearly as successful. Em-ployers and husbands across the country reported almost no deviations from the normal flow of life. It seems most women weren't even aware that they were supposed to strike' in the end, Alice did.

frontally there was another departrontally there was another depar-ture from the story line of I systemata. The participants in the NCW campaign cancelled their activities not to protest a war but rather to residue a war — the war for equality of the sexes.

The Equality of the Sexes

to most people in our increasingly secular equality increasing society, sexual equality would seem to be a laud able goal. But the worthiness of the goal depends upon what is meant by "equality. If the feminists mean the recognition of equal ability and provision for

Who can find a virtuous woman? She openeth her mouth with wisdom; and in her longue is the lew of kindness.

- Proverba 31 10, 26

cqual opportunity to use that ability (whether through the home education of or career) then the goal is indeed a

worths one. This type of equality may have been the original gold of Women's Lib (and in fact still is the goal of many sincere women) but it is not the kind of equality that the movement is demanding today. Women's Lib today is concerned with something far beyond these maters its goal of the abstract of all set roles.

ters Its goal to the aboltion of all set roles As Mis Katen (Set from newly elected president of NOW proclaimed in her campaign stogan. "Out of the mainstream and into the revolution."

This seemingly innocuous statement espices the basic problem with manyly leadless of the Women's Lib Movement who want to overthrow society Gay Pauley. "We have only scraped the surface in the worldwide women's liberation movement. The revolution now

real momentum and will not cease

has real momentum and will not cease until the patriarchal system in most of our cultures is overthrown."

The key phrase, "patriarchal system," as used by women's libbers, means more than an overbearing, middle-aged male and his extended family. It means a whole system of morality—much of it grounded upon biblical principles which acts to preserve and protest the family unit as the building block of society.

MS: Marxist Sisters?

Appropriately, the women's movement adopted the clenched fist—the same symbol that the Black revolutionaries and the Marxists use as one of their symbols.

The movement, as it now stands, wants to overthrow more than discrimination against women. It wants to overthrow all of the sexual distinctions that make up a part of civilized culture, both Western and Oriental And they will in

deed fight to do this Women's Lib has more in common deed fight to do this.

Women's Lib has more in common with Marxist revolutionaries than just the symbol of a fist. Some of the more radical writers in the magazine AV set writtailly plaguarizing Marxist speeches when they write about "oppression," "liberation," "exploitation," and "sexistim" Perhapa the letters MS should stand for Marxist Sisters Indeed, the awowed leaders of Women's Lib. Germanic Greer, Gioria Steinem Betty Freidan and many others hold extremely left unig palitical sews.

Just as the awerage Marxist scottis tremely left unig palitical sews.

Just as the awerage Marxist scottis changes which make switch in militants call for a society far different from one which simply pays equal sagges and allows women to rise to tient fullest extent. They want a society without the dreaded "patriarchy" and the "traditional middle-class morality" which often reas on a biblical base.

often rests on a biblical base

The Example of Mrs. I hatcher

The Women's Lib response to the political rise of figland's Margaret That their is a perfect example of their twisted ideology. Mrs. Thatcher should symdeology Mrs. Thatcher should symbolize what the movement says it supports an able extremels bright words which through brians and hard work makes the best use of her talents to rise to the head of the Conservative Party in

On the head of the Conservative Party in British (Diviously) the members of the Womens Lib Movement should applied Mrs. Thatcher's roc in her party's hierarchy (by they all? No the militanu accen't pleased as all.

While the majority of moderate fermines rally behind the example of Mrs. Thatcher the radical spokespersons of the movement denounce her middle class morality and lack of revolutionary views Mrs. Thatcher desen't want as exist. Thatcher deen't want as exist, where human distinctions are blurred and "persons are blended into an egalitarian soup" side is in favor of blurred and "persons are blended into an egalitarian soup she is in favor of traditional middle class values like thrift, responsibility, diligence and hard work, values which one might apply to either make or female. The radical libber's rejection of Mrs. Thatcher makes one wonder Are they against incequality, or are they just uncomfortable with morality?

The pattern that emerges is unm

ably Marxist. The Soviet Union, a basany warkti The Soviet Union, a bas-tion of male chauvinism where the women hold full-time jobs and also take care of the family, is ratef condemned by them Instead, feming t leaders speak of the "decline of capability and the conomics" as if they were Markitt theoreticians.

Marxism in Mexico City

At the International Women's Confer-ce held last summer in Mexico City. ence held last summer in Mexico City, the theme was not equal opportunities for woman, but the promulgation of an international welfare state, whereby the "declining capitalist" economies would be soaked for the benefit of the Third World

orld
At that same conference. Third World spokesman I us Echeveria called for the obliteration of the traditional femi-nine role—whether voluntarily ac-cepted or not! "It is essential to avoid encouraging women on the basis of a mistaken concept of freedom, voluntarily to continue to accept the marginalizole which has been imposed upont them."

Echeverria's remarks were a call for, enforced "freedom" in effect, he as-serted that women are not free to decide to be what they want to be but that they should conform to the revolutionist's conception of "liberation" Most women are interested in equality and liberation, but these Third World ideologues cast

nut these third World ideologues cast those noble words into a disguise for blatant totalitarianium. The end result of such sexual freedom is the abolition of moral codesiand the eventual death of the family unit.

Sexual Suicide

George Gilder, in his book Sexual Sucree, some that the family is the maintain of civilized society. Societies without a family system remain on a primitive level, and those technological societies who began withat family system, but later decided to weaken the

family's influence, often are totalitarian

A family unit necessitates roles and purposes of some sort. No person will stick to a family with all indemands on steet to a samily with all ##demands on time and labor unless there is a purpose for his efforts. When the radical femi-nists call for complete sexual freedom and the abolition of any roles (whether they be traditional or non-traditional makes no difference), they are advocat-ing the destruction—of the family and society as we know it. society as we know it

At this point, the ultimate goals of the hard core liberationist become clear: She seeks a society of absolute iron-clad equality, with no natural distinctions between human beings no maternal duties, no moral codes no middle class a society which resembles the sterile egalitations of Huxley's Brave New World, the enforced scalessness of Or-well 1/94, or the totalitation state-run dormhorles for raising children in Ayn Rand Manhem.

Women - Speak Out!

Don't confuse the original, worthy goals of the Women's Liberation Movement (such as equal pay for equal work) with the totalitation equality (the aboli-

ment (such as equal pay for equal work) with the totalitarian equality/the abilition of human differences) now infiltent within the movement. The former makes society a little better, while the latter draws an arrow at civilization's frail heart, the family life time for responsible women worldwide including the liberated women striving for equal opportunity—to speak out against the dominant forces of the Women's Liberation Movement. If more women would discorn the radical fringe, more men would accept more readily the reasonable requests of responsible women if women sect to change focaety, but end up abolishing the family, they will be quite literally throwing out the baby with the bath water.

The Hollow Shell On the East River

The "Dis-united Non-nations" have done it again. They have voted to link Zionism with racism in what the U.S. Ambassador Daniel Moynihan.

labeled 'an infámous act '
By now you ve all heard about it Perhaps you heard some of the rhetoric on

And by the way did you notice who voted in tavor of that-resolution? Nations such as Yemen, South Yemen, the United Arab Emirates Sri Lanks — in fact, vir-tually the entirety of the Third World. Also

tually the entirety or the Third World Asso poli the lat were such powers' as Oman-Bind Mall. And São Tomé, a Principe. A lot of you don't even know where those nations are sociated.

São Tomé a Principe for your information, is nothing but a couple of islands just off ye west coast of Africa below the bulge of the Continent It is a former Portuguese colonial possession which, song with Anglos and other Portuguese colonies in Africa, have recently achieved independence.

colonies in Africa, have recently achieved independence. Sar Tomé e Principe has an alretrip, but not much else I stopped there for jet fuel one time. Yet it has one vote in the U.N. General Assembly. In this regard the vote of Salo forms e Principe te sugottly equal to that of the United States, Francis Belgium. efore, the U.N. is a focal point of global onthowers, bitterness, and racism. The United Nations was formed in the termath of a shocked world discovering to persecution and the extermination of x million. Jews in Hitler's overs. The offed Nations was exhalled by the U.S. The offer National States of U.S. The U. United Nations was established in a time when world leaders vowed that such a holocaust could never again overtake free people anywhere in the world. Now the U.N., thanks to the farce of the onenation, one-vote principle and the mus-tering of huge-bloc-voting majorities, has come full circle to condemn the very people who were the most myld example of racial properties.

of racial persecution
The UN General Assembly has be-The U.N. General Assembly has become nothing more than a shrill sounding board of anti-democratic anti-American propagands: It has no power to impose a settlement upon any antagonists in any corner of the world. It has only the power to generate a great deal of rhetoric and a great deal of publicity.

I was jumprised when I found that a recent poll said that U.§ public approval of the United Nations stood at 34%. But that was before "these recent" poll services in the first was before these recent powers.

of the United Nations stood at 34%. But that was before these recent events: I would imagine at least it il be down below 10% by the time the -luft impact of that resolution finds its way into the public consciousness. One thing is sure. The hollow shell on the East River is netting;a notion shell on the East River is neither, a step toward wynd peace or world government. And is it is not settle and the step of the settle step of the settle settle step of the settle settle

Rephreces for Our Time New
Viewing all of the above is it any wonder then, that men and nations have not
succeeded on, their goldest for world
peace? Is it any wonder that since the
establishment of "mains last hope for
world peace we have had wise, and revoliubon's going on all around the world
along with unbridled hetred raciem and
alteriched interported. Competitions entrenched ideological competition — and we're seeing more of these things,

of the earth would seem to be in

of the sarth would seem to be it? a yield upheaval.

And he spoke, in terminology that could only be understood after August 1945—in the gnodern day of nuclear weapons arsenais that can deliver the kitting power to exterminate the antire human race in

are trians trial can conver the kning power to exterminate the entire, human race in an ell-out global World War III. That pnewscaster was named Jesus Christ. The prophecies Jesus left behind word occurred to thost that they related the property of the state of the fer to the day in which we live and the stime just shead of us in world events.

Watch Western Europe

For many gears in Plain Truth I have been saying that you are going to see two major event develop is strossed for years during the very depth of US involvement in Vetnam that events in both Europe and the Middle East would someday pate to constitutions. Into insignificance our preoccupation with the war in Southeast Asia. That has happenedi

happened!

For-gyears on The World Tomorrow
For-gyears on The World Tomorrow
For-gyears and the second of the seco

could the resourcement or the Container of Europe Becently as we reposed fully in this last seaso of Pean Turk the pupe said that our mission as beenops in Europe takes on a gropping perspective. He added that no other human force in Burgope Can render the service that is confided to us promoters of the faith to awaken the Christian soul of Europe where its unity is rooted.

It is remarkable to read some of the faith and the confidence of the mission of the confidence of the magazine.

Over the entire 13 years of his ponthings the cope Paul has called for European unity repeatedly. And so have many political leaders in Europe

nity hapeatedly: And so have many politi il leaders in Europe ...

unity repeatedly: And so have many political leaders in Europe of the engine of the engine end of the end of

tary consolidation in Western Europe whether one speaks of the European Coal and Steet Community or the Common Market Euration of the European Market Euration of the European Parliament - is a "step forward in reaching uttensite complete European unity. Key leaders in Western Europe especially in West Germany - and Franz Joseph Streaus in particular - have callestoontinustry for a united Europe of spmithind stating that it should have its ownitudear force.

Now we have a unique call from thi-Valican to supply the one common factors on the supply the one common factors on the supply the one common factors on the supply the one common actors on the World Tomorro-broadcast. These will have to be a unitying torce beyond mere mationalism. orosocast There with have to be a uni-hing force beyond mer nationalism beyond even the sconomic, the political and even military conjuderations. There, would have to be a deeper, unitying forc-of a common culture and religion to gis the diverse nations of Europe a sense of

is this call for the "Christian conscience of Europe" the missing "eliment? Q
